Semi opaque honeycomb fabrics

It is better than pleated fabrics in function, but it has all the characteristics of pleated fabrics at the same time. So it can be called a perfect product. Because of his D-shaped design, it will maintain its pleated effect no matter how long you will use it.

Black out honeycomb fabrics

It is one kind of honeycomb fabrics, which can keep the room quiet and block the noise outside, and maintain the inside temperature and resist the sunshine. It can provide your better privacy, because of the feature of black out. We have various color available, and semi opaque fabrics too. It can be designed for dining room, bath room and study room.

HONEYCOMB BLINDS

Day and Night blind

Using sheer fabrics, and black out fabrics in one blind, can meet all your requirements about the light in different condition, at the same time keep your privacy.

Vertical glide

Honeycomb fabrics, with elegant vertical line and transversely closing and opening design, make it fit for french casement and sash door.

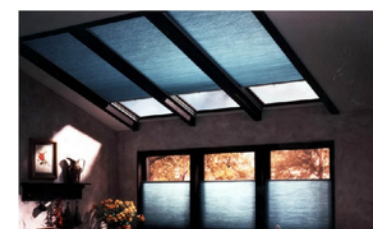

Up and down blind

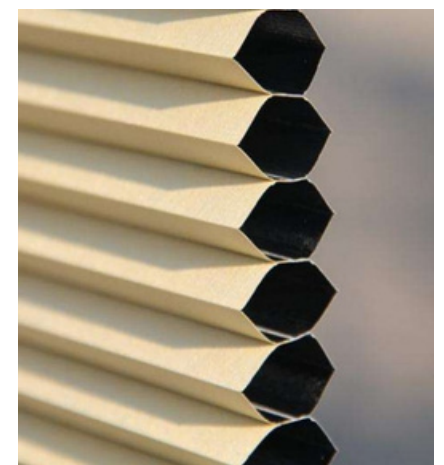

The blind with Top down and bottom up design can make the sunlight shining the room without any block, and make the indoor and outdoor combined in a harmonious way.

Skylight

The skylight can be opened and closed to reach your requirement about the light. Semi opaque and black out can be used to make the skylight.

HONEYCOMB BLINDS

Innovative, beautiful and energy efficient, Honeycomb Blinds represent the ultimate in window coverings.

Honeycomb blinds features a cell structure that allows air to be trapped within the cells, providing superior energy efficiency that can help you save up on your heating costs.

Aside from this, the fabric is made from anti-static, nonwoven polyester which aids in the resistance of dust, making this durable fabric easy to clean and maintain.
